

Replacement of the raise and lower mechanism for the mini-blinds

1- Take off the lower stopper, you will be replacing it later.

2 - Slide the mechanism until it's completely off the rail.

3 – Make sure that the mechanism as 6 magnets on each side. Add some magnets if needed before the installation.

4 - Re-insert the mechanism on the rail by making it slide upward.

5 - Make sure to slide the mechanism at the top of the rail.

6 – Slide down the mechanism until the mini-blinds are completely closed. Peel off the paper from the back of the stopper and install it at the bottom of the rail.
